

DIEU ET MON DROIT

Farmer. 1612.

His Prognosticall Almanacke
for this Bissextile yeere, composed with a Three-
fold Kalendar, calculated for the generall vse
of this Kingdome of Ireland, which may also
serue as wel for al the North & Northwest parts
of Eng: Diligently collected and gathered by
William Farmer Chirurgian, Practitioner in the
Mathematicall Artes, referred particularly
to the Latetude and meridian of the
Auncient Citie of Dublin

Latetude 53. 10.

Longitude 13. 80.

The beautie of the Heavens are the glorious Starres,
and the ornaments that shineth in the high places of
the Lord.

By the commandement of the Holy one, they continue in
their order, and faile not in their watch. Eccl.

43. 9 10.

Heretinto is added a breife Computation of
times, and things done since the first inhabita-
tion of this Kingdome.

Also a briefe Register of all the principall
Highwaies of Ireland, with the distancess and
number of Miles from Dublin to any principal
remote place of the Kingdome: With the chiefeſt
Faires and Marts as they are vſually holden or
kept within this Realme.

DUBLIN,

Printed by John Franckton,
Printer and Stationer to the
Kings Maieſtie.

The briefe contents of this Almanacke.

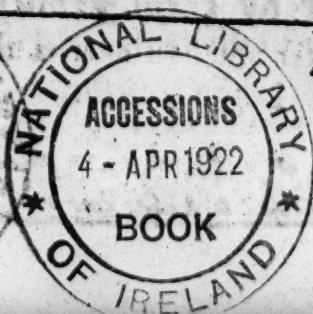

1. An Epistle to the Honourable Estates and Republike, &c.
2. A briefe computation of divers memorable shings done in this Kingdome since the first inhabitation.
3. A briefe and exact Table of all the Kings of England since the time of William Conqueror.
4. A briefe Catalogue of all the LL. Lieutenants, LL. Deputies, and LL. Justices, which haue gouerned in this Kingdome since the discharge of Sir Edward Poynings, which wa. Lord Deputie here in this Kingdome about 118 yeeres since.
5. My threefold Kalendar with the dependences.
6. A briefe discourse of two Ecclipses which shall happen this yeere.
7. A discourse of the fourre quarters or seasons of this yeere.
8. Compendius Phisicall elections for ministracion of Medicine.
9. A Register of the most principall Highwaies throughout this whole Kingdome verie necessarie for all Trauailers.
10. A Register of all the principall Faires of this Kingdome.

The Printer to the Reader.

My Reader, I haue taken paines and charges in benyng the printing of this Almanacke, in hope it will be accepted of: It fall out to be much bigger then the common Kalendar, by reason of many necessarie notes in it for this Kingdome worthy of remembrance, more then hath beeene hitherto euer printed.

And althoough I haue not painted it with Red Letters altogether, yet haue I set a diuerteine of Characters, that you might know the daies of moneth from other daies: The reason partly was, that printing so smale a number of hem, it would not cōsuile halfe the charges, neuer ther could I haue had it readye in due time printed. But it shal be now accepted of, I shall hereafter be the more willinger to be at greater charges.

Yours L. F.

**C TO THE HONOVRABLE STATE,
AND WHOLE BODIE OF THE COMMON-**

Weale in this Kingdome of Irelond. W. F.
wiscketh. &c.

Eloued Reader, for the necessarie vse & commoditie of this Weale publicke, I haue calculated for this present Bissex-tile yeere, 1612. this my Prognosticall Almanacke, Composed with a Three-fold Callender, which peraduenture may seeme somewhat strange at the first sight: But after considerat on had of the reasons and arguments thereof, it will appeare more plaine and more easie to the common vnderstanding.

Now, if it were demanded wheresoere I haue in this yeere tripled my Kallender more then other Prognosticators haue beene accustomed to doe, or more then my selfe haue done in yeere by past: To which I do answeare, That I haue alreadie calculated other Almanackes with Two-fold Kallenders: namely, one which was printed in London for the yeere of our Lord 1587. wherem I was the onely first man that euer inuented to coup'e the new reformed Gregorian Kallender (with a draue comparison) together with our o'd and vsuall Kallender: & therem I haue shewed the chiefe causes & the originall groundes of their late alterations, and euer since that time I have caried in my minde a full resolution, to compose in some one yeere or other, A Threefold Kallender, whereby it should appeare vnto the world, that there might be yet another alteration made which might bring foorth a third Kallender, farre more exact and more true than either of those are which now we haue in vse.

Vizt.

{ Our olde and vsuall Kallender.

{ Their new Gregorian Kallender.

{ The exact and most true Kallender.

A 2

The

The Epistle.

The first of these Kallenders which we doe still vse, is meere false, for it doth continually ingender certaine illigitimate daies, whereof wee haue at this present time, almost 13. daies ingendered alreadie, since the Incarnation of Christ.

The second Kallender which the Church of Roome doth vse, notwithstanding that they haue corrected 10. daies, according to the computarion of the Nicene Councell, and yet it cannot be exactlie true, because they haue not exempted 13. daies, which is the errour ingendred since the incarnation of Christ.

In the third Kallender, wherin I haue cast awaie 13. daies, you shall behould the Spring Equinoctiall to ioyne it selfe verie neare to the day of the Annuntiation of the Virgin, euen as it was in the yeare of the incarnation of Christ.

Likewise, the nativitie of St. John Baptist to ioyne close to the Summer solstice, or longest day in the yeare, euen as it was in the yeare of the incarnation of Christ.

Also the nativitie of our Saujour Iesu Christ to happen vpon the Winter solstice, or shortest day in the yeare, euen as it did in the yeare of the incarnation of Christ.

Therefore I do hould this third Kallender to be the most true and exact Kallender of the three, which is not in vse with vs, neither can come in vse yntill it maie please his most excellent Majestie by his emperiall prerogatiue to gire wale vnto this manner of alteration, in the meane space we must content our selues with that Kallender which we do now vse, for although an error do grow from time to time, yet it doth not grow with anie such expedition that it should proue prejudiciale to anie man touching his confidence in Religion, or other disturbance in ciuill busynesses, because the growing error is but one Illigitimate day, in 134. yeare, or thereabout;

Part well in Christ.

W. Farmer.

A Briefe

A Briefe computation of times, and memorable things done in this Kingdome of Ireland, since the first inhabitation ther eof.

0000. Since the Creation of the Worlde. 5574.
1656. Since the uniuersall Flood. 3918.
1956. Since Easolenus, one of the line of Japhet the third Sun
of Noah, after the confusio[n] of tongues, came into this Iland to in-
habite with 72. others. 3618.
Among the 72. aforesaid, there were of the seede of Canaan, Japhets
elder Brother, who grewe mighty, and strong in the land, these
were called Giants, wha roote[n] out and distroyed all those of the
line of Japhet, and kepte the land to themselues.
2714. Since the five noble Cretians, the Honors of Dela: Painelie:
Gandius, Gthandius, Dagius, Rutheragus, & Solanus, came into
this Iland, and did vitterlie vanquish and destroyed all these Giants,
and deuided the land among themselues into fve severall prouin-
ces. 2860.
3596. Since Egengratus King of Brittaine, now England, gaue
this Iland to certaine vagrant Spaniards. 3978.
3678. Since Fergustus was dethroned at Cartisergus, of whom that
towne tooke the name. 3896.
3917. Since Julius Caesar was murdered in þ Senat at Roome. 1657.
This Julius Caesar after his Conquestes in Egipte, established a
potterie Ballender among þ Romans, which was grounded vpon
certayne Solarie & Lunarie rules, which he sought amongst the E-
gyptias Annuall computations, wherupon he framed the rules for þ
commen and bissextile yeares, which haue bene in use ever since al-
most throughout the whole worlde, vntill now of late by some defect
that is found therein, þ Romans haue altered all those olde Ballen-
darie rules, and haue established other newe rules, which the fauorites
of the Romane Church that are in this Kingdome of Ireland, do seek
to maintaine so farre forth as they may, keeping all their Festiall
dates at other times then we doe: which is partie the cause that
this

A Prognostication.

this threafold Malender is now composed, to wels mein that neither of vs hath so true a Malender as of right we ought to haue.

3962. Since the Incarnation & birth of our Saviour Iesus Christ. 1612.
432. Since the people of Ireland were first converted to the Christian faith by St. Patricke.

This Patricke was borne in Cisbure in the North part of England. he was wel instructed in christian religion, about 15. yeres of his age, he was taken prisoner by Mac a Manne a海上robber, he was brought into Ireland and put to keepe Divine, after 6. yeres he found a peice of gold, wherewith he redeemed him selfe from his Maister, he went into Fraunce to his Uncle St. Martin, he was 40. yeres discipole to St. Germaine: for his vertuous life, and zeale that he had to convert the people of this Iland, he was sent hither by Pope Celestine p^rime, as Arch-Bishop of Ardmagh and Primate of all Ireland, when he was 62. yeres old.

518. Since Ireland paide tribute to King Arthur. 1094.

900. Since the three noble brethren Esterlings otherwise called Ostmans, nameleis Auellanus the elder brother did build the Cittie of Dublin, and began y building of Christ's Church, which afterwards was finished by the Danes. And Estaracus the second brother did build the cittie of Waterford. And Paorus the youngest brother did build the cittie of Limbrickie.

1050. Since the Danes fleswe Brian Borough and many others. 562. Donatus is named to be the first Bishop of Dublin: the yere of his consecration is yet unknowne: but he diesseased. Anno. 1074.

Patritius, the second Bishop of Dublin was consecrated. Anno. 1074. and diesseased. Anno. 1085. Donagus, or Donugus the third Bishop, was consecrated. 1085. and diesseased. 1095.

1095. Samuell was the 4. Bishop of Dublin, & was consecrated. 1095. and diesseased Anno. 1122.

1095. At this time came into this Iland a newe supply of Esterlings or Ostmans, and dwelt uppon Ormantowne greene, or Ostmantowne greene.

1097. Since one Malcus was the first Bishop of Waterford. 515.

1152. Since Gregorius, was consecrated the first Bishop of Dub:

490.

A Prognostication.

This Gregorius lived in that sea 40 years and about 26. years of his Episcopall dignitie, Pope Erginius the third sent letters for the confirmation of the Primacie of Ardmaghe, and the Arch-Bishopricks of Dublin, Cashell, and Tuam: and also sent Pallcs vnto them, and herevpon as I doe conjectur it is recorded by some writers that this Gregorie was the first Arch-Bishop of Dublin, and that one Gelatius was the first Primate of Ireland. But it is said a little before that Pope Celestine sent St. Patrick into Ireland with the dignities of Arch-Bishop of Ardmagh, and Primate of all Ireland. Now accepmting this Grigorie to be the first Arch-Bishop of Dublin. I do (meane, God permitting me,) to set downe in another worke, a Catalogue of all the Bishops and Arch-Bishops that haue been in this sea from Anno. 1074. vnto this present yeare. 1612.

1154. King Henry the second began his Raigne ouer the Kingdome of England the 25. of October.	458.
1169. About the 15. yeere of his Raigne began the first entrance of þ English into this Land, soz then came ouer Earle Strangbow, Ro- bert Fitzstevens, and Maurice FitzGiralde, about.	443.
1176. Since the blacke Castle at Laughlin Eridge was builded by Sir Hugh Delacie.	436.
1180. Since S. Patricks Church was founded by John Comyn Arch- Bishop of Dublin.	432.
1186. Since Sir Hughe de Lacie was slaine by a churle at the building of the Castle of Derwath.	426.
1189. King Richard the 1. began his raigne. Iulie. 6.	423.
1199. King John began his raigne. Aprill. 6.	413.
1209. Since the first blacke murday in Ireland.	403.
1216. King Henrie the third began his raigne. October. 19.	
1220. Since the Castel of Dublin was founded by Henrie Loundres, Arch Bishop of Dublin, and Lord Justice.	392.
1227. Since the first Mastro & Baillifes of Dublin.	385.
1242. Since the Castle of Hylgo was built.	370.
1272. King Edward the 1. began his Raigne Nonember. 16.	340.
1301. Since St. Warbooughs Church in Dublin was the first time de- stroyed by fire, and was bulite againe at þ charges of þ Parish.	311.
1307. King Edward the 2. began his Raigne Iulie. 7.	305-
	Since

A Prognostication.

1308. Since John Dacer Maioz of Dublin built the High-pipe and the
Bridge of S. Ultannes. 304.
1315. Since, 30. Knights were dubbed on Michaelmas day in y Castell
of Dublin, by Sir Edmond Butler, Lord Justice. 297.
- About this time, John fitz Thomas fitz Giralde was created the first
Earle of Kildare.
- Edward Bruce brother to the King of Scotts dwelle in campe with an
armie at Castellknock.
- The Winetauerne gate and St. Dwens gate weare bulded.
1317. Since the people of Chills Church in Dublin was overthrowned,
by a myghtie tempest of weather, some doe say it was burnte with
fire from Heaven. 295.
1319. Since Maurice Iaks a cannon of the Cathederall Church of Kildare,
caused the Bridges of Kill-Culline & Laughlin to be bulded at
his charges. 293.
1320. Since Alexander Bignoz Arch-Bis: of Dublin, by authorisatie from
Pope John 22. erected a Colledge in the same Cittie, out of which
proceeded 3. Doctors of divinitie, & one of the canon lawe. 292.
1325. Since Adam Durfe Otoole was burned vpon hoggin greene,
because he denied the incarnation of Christ, the trinitie of persons in
the Godhead & the resurrection of the flesh.
1327. Since James Butler was created the first Earle of Ormond, &
Maurice fitz Thomas, a Giraldine the first Earle of Deslmond. 285.
1327. King Edward the 3. began his Raigne Ianuarie 25. 285.
- 1377 King Richard the 2. began his Raigne Ianuarie 21. 235.
- 1399 King Henrie the 4. began his Raigne September 29. 213.
1402. Since John Drake Haioze of the Cittie of Dublin with a bande
of his cittizens, neare vnto Breye, slew 4000. of the Rebells, some
histories doe say there was but 493. slaine, whether soever it was,
there was good seruice done of cittizens. 210.
1409. Since y^e stwoode was borne before y Maioz of Dublin. 203.
1413. King Henrie the 5 began his Raigne March 29. 199.
1422. King Henrie the 6. began his Raigne August 30. 190.
1461. King Edward the 4. began his Raigne March 4. 151.
1483. King Edward the 5. began his Raigne Aprill 9. 129.
1483. King Richard the 3. began his Raigne June 25. 129.

King

A Prognostication.

1485. King Henrie the 7. began his Raigne August 22. 127.
1492. Since Richard Simonds a priest, presented unto Girald Earle of
Kildare, then Lord Deputie a yong youth called Lambert, anouch-
ing that he was Sonne to George Earle of Clarence, & that he was
escaped out of the Tower of London, and to be shorte this youth was
crowned King in Christ Church of Dublin, and was honored with
sunderite imperall titles and so was carted to the Castle of Dublin
with great soye and triumphe. 120.
1503. Since the same Earle of Kildare being Lord Deputie, making a
Toznie into Conought, having in his compaines, John Flakke Malor
of Dublin, gane an ouerthowe at Knocktowe to the greatest armie of
the Iriſhe that ever was ſeen together ſince the firſt conqueſte of Ire-
land, for whch ſervice, þ Earle was created Knight of þ Garter. 109.
1509. King Henrie the 8. began his Raigne Aprill 22.
1510. Since the new chappell in Chrift Church was builte for the bur-
iall of the same Earle, 102.
1513. He was interred in that chappell. 99.
1534. Since Thomas fitz Girald his Warres. 73.
1537. In a Parliament holden at Dublin it was enacted that King
Henrie the 8. then King of England and Lord of Ireland, ſhould be
called ſupreme head of the Church of Ireland. 75.
1542. Hitherto þ Kings of England have been called Lords of Ireland,
but now it hath bine enacted in a Parliament holden at Dublin that
the Kings of England ſhall be called Kings of Ireland for ever. 70.
1542. King Henrie the 8. the firſt that was called King of Ireland. 70.
1547. King Edward the 6. began his Raigne Ianuarie 28. 65.
The ſame ycare John Rians and Thomas Fininges were the laſt
Baileses and firſt Shirifes of Dublin: the cronickie nameth Robert
Rians, not Thomas Finings.
1553. Queene Marie began her Raigne Julie 6. 59.
1558. Queene Elizabeth began her Raigne Nouember 17. 54.
1582. Since the Gregorian Ballender began. 30.
1542. Since a Parliament holden at Dublin it was enacted that Kings
of England & their ſuccessors ſhould be caled Kings of Ire: for ever. 70.
1588. Since diuerſe ſhippes of þ Spaniards, with their Captains, and
Soldiers, their goods and riches, were by the ſuſt judgement of

A Prognostication.

God dwrowned vpon the coasts of Ireland: these intended þ conquest
of England. 24.

1592. Since the Trinitie Colledge i. i Dublin was buildest. 20.

1597. Since the spoile with gunpowder in Dublin. 15.

1600. Since St. Warburoughs Church in Dublin was spoyled againe
the secon time, and broken dwone by the fall of þ Steeple. 12.

This church was againe the second time, buildest at the charges of the
Parishioners, among whom Mass: R. W. bestowed verie liberal-
ly, and John Lanier, with Nicholas Haward, vised such a christien
care. (they being Church-wardens) that the Church in this newe re-
edifing therof is made farre more beautifull, and in better fashon then
ever it was before.

1601. Since the great ouerthowse, as well of the Spaniards, as of Ti-
rone with his Irishe forces, was gauen at Kinsalle, by þ Lord Mount-
joye, then Lord Deputie, and Sir George Carewe, then Lord Pre-
sident of the province of Munster. 11.

The same yeare, the newe Testament was printed in the Irish: tongue,
(at the charges of Sir William Uher Knight,) by John Franckton,
newe the Kings Printer, in this Kingdome of Ireland.

1603. King Iames began hi. Raigne March 24, Vnuat Rex.

Since Sir Arthur Chichester, Knight Lord Deputie of this King-
dome, procured Doctor Daniell Lord Arch-Bishop of Tuam to tran-
slate the whole booke of the common prier into the Irish tongue, and
caused it to be printed and dispersed throughout the Churches of this
Kingdome, also he compelleo the inhabitants of Ireland, to repaire &
redresse all their runnates Churches in the whole Land.

The years, Monthes & daies (accomp-
ting the year current) wherin euerie King
of England, since the conquest, began
his Raigne.

The Yeares, Moneths
& daies, that each of
the Kings & Queenes
did Raigne.

A Table of the most generall notes, whereby the severall yeares are to be distinguished for euer, concerning the mutabilitie and yearly alterations of the Kallenders, with the Feasts mooueable and fixed, with other dependances, referred to the vse of this pres: Bissextile yeare. 1612.

<i>General notes.</i>	<i>The olde Kallender</i>	<i>The new Kallender.</i>	<i>The true Kallender.</i>
Golden number.	17.	17.	17.
Circle of the Sun.	25.	25.	25.
Epact.	26. til March 7	27. al þ yecre	27. all the yeare.
Dominicall Let.	E. D.	A. G.	D. C.
Indit. Rom.	10.	10.	10.
Inter vallum.	8. weeks 4 da.	10. weekes o.	10. weekes 3. daies
Septuage. iiii.	9. of February	9. of Febru.	22. of Februarie.
Shroue Sunday.	23 of February	4 of March	7. of Marck.
Easter day.	1 March.	11. of March.	14. of March.
Rogation sund.	12 of Aprill	22. of Aprill.	25. of Aprill.
Ascention day.	17. of May.	27. of May.	30. of May.
Whitsunday.	21. of May.	31. of May.	3. of June.
Trinitie sunday.	31. of May.	10. of June.	13. of June.
Sundates from Triniti to Adue.	7. of June.	17. of June.	20. of June.
Aduent Sunday.	{ 24	23.	22
	29. of Novem.	2. of Decem.	28. of November.

These are þ notes generally to bee enquired of in all Ballenders for euer, in what computation so euer they shalbe made.

These notes are answerable to the wandring motion of the Equinoctiall which hath gon astraye 13 daies from the true day, where it was in the yeer of the incarnation.

These notes are answerable to the new corrected Kalleder, which doth still retaine in it 3. erronious or illegitimate daies.

These are the notes of the most true kallender, standing as though the Eqinoctium had not strayed from his place where in it was in the yeere of the incarnation of Christ.

A PROPHETICAL WORK.

In this yeare 1612. there shall apperte to our sight, aboue our Hoyle
yon two Eclipses, vidz: one of þ Moone, the other of the Sun.

That Eclipse of the Moone shalbe vpon
þe 4. day of Maye. Beginning 9. minuts after 7. a clocke at night,
And increasing in darknes, till 8. a clock 35. min:
Ending at 10. a clocke 1. min:
The whole continuall 2 hours 52. mine
The points Eclipsed 7. fere.

The Moone shall begin to enter into her Ellipticall obscuritie 33.
min: before Sun setting, her bodie being vnder the Earth, so tha: when
her light apperte above our Horizon, she shall shewe her bodie partis
Eclipsed increasing her darknes mo:re and mo:re, vntill 53 min: after
Sun setting vidz. till 8. of þ clocke 35. min: in the Evening, and then
she shall begin to recover her light by little and little, and shall be dis-
charged of all her obscuritie, about 10. of the clock, and one min: &c.

It will not be long after this Eclipse, but that y effects thereof shall
begin to shewe themselves in mouing some sedition, discencion, or warre
with some kinde of destruction, among the baser sorte of people, or some
secreat surres, with destruction or havocke to be made vpon people and
creatures living in and about the Casas and Seacoasts &c.

And sometimes such an Eclipse, moueth Earthquakes, distemperature
of the Aire, by thunders and lightnings, and doth threaten to þ bodies
of men, hot Feuers, and other strange diseases, as Proclus saith.

And it maye verie well happen so, for Mars which is the onlie disposer
of this Eclipse, and is also Lord of the yearlie revolution, is corporallite
Ioyned to Warre: a plannet of euill condition.

Also her receiveth a malevolent aspecht from Venus, which is placed in þ
house of Death, having also government in the house of SICKNES wherby
those sicknesse mateyroue mortall and deadlie, Chyflike to those which
haue the 24. degrees of Scorpius, or Leo, or Taurus or Aquarius,
ascending in the Horoscope of their nativitie, and those that haue þ
same degrees in the 10. House of their nativitie mate be touched in
their honor, credit and good name, likewise those which haue their
part called pars fortuna placed in anie of those degreis, or those degrees
appearing vpon the Cuspis of their second house, mate be touched in
their wealth, riches, and substance &c.

Begynning

A Prognostication.

Beginning at 8. a clock 22. in the Morning.
That Eclipse of the Sun shalbe on the 20. day of May.
Increasing in darknes, till 9 a clock 4. min.
Ending at 10. a clocke 26. min:
From the beginning to the end 2 hours 24. min:
Points Eclipsed 8. 13. min: fere.

The bodie of þ Moone by her progresshall motion, late in þ Evening before this Eclipse did slide ouer the Eclipstick line, leauing behinde her þ Serpentine Section, of þ Dragons head caled Anabazon. And marchyng soþwards towards the 8. degree 33. min: of Gemini, ascending septentrionalite in 0. degree 36. min: of her Northerne Latelude, she bindeth the Sun there, making his progression with a verie lowe motion, where she doth overtake him and giue him such a counterbuske vpon his sepentrional parts that shee depriveth (for a time) the fruits of the Earth, and the People inhabiting these parts of the world, of more then 2. third parts of his whole light, by means wherof both þ people and fruits of the Earth maie sustaine much hurt and damage in time to come. For the ancient Astronomers haue obserued, that when the Sun shalbe Eclipsed in a signe of the Aries triplicite, it doth threaten þ people to be infected with some pestilentiall sicknes or general plague.

And as Proclus affirmeth, because this Eclipse doth happen in the first face of Gemini, it moueth and strech vpon Priests and religiouse men to discention, strife, sedition, & unspeakable hatred, contempt of lawes, and neglect of Religion. And because this Eclipse of þ Sun is not performed without the consent and neare touch of the second face of this Signe of Gement, therfore we maie ad vnto the former Judgements, the threatening of slayghters and Rabberies to be committed at þ Seas by Pyrats, and Sea Robbers &c.

But these sterres doe not appeare so speedlie, as thole of þ Moone do. & therfore I will not speake ante further of them vntill a nother time &c.

Of the fourc quarters or seasons of this yeare 1612.

The Winter quarter which is properlie appertaining to this Julian or civil yeare of 1612, is that space of time compreñended betweene newe years daie & the 10. of March. Which quarter did breake in the 11. of December last past 1611. at 13. houers 22. min: from þ Moone when

the Sun entred into the first i[n]te[r] of Capricorne, making then the
Winter Solstice, or shortest day of the yere.

This season ought naturallie to be cold and monke, bat by collecting
the testimonies of the Starres, according to their severall configura-
tions among themselves, I doe finde that this season is like to be incli-
ned more to heate then could, and moze to dries then to moisture, ther-
fore considering the nature of our Climate and the season of the yere,
together with the configuration of the celestiall boodes in the theame, we
make well Judge the weather in this season to be of a good temperature,
& faire for the most parte, & therefore pleasing to Farmours, and all such
as vse to till and sowe the ground with any manner of graine according
to the season.

But heareby the authoritie of Alcabicius, I doe glue this caueat to al
those that vse plowing and sowing, not to sowe any manner graine or
seeds either in field or garden, vpon any day that the Moone shalbe
eclipsed at night, nor one the day following, for whatisoever shall then
be sowed, shall not prosper but die sh[ould] lie after it is g[rown] vpon Alcab-
icio affirmeth the same by his owne experiance, notwithstanding where
God doth blesse, all rules shall cesae.

The equinoctiall spring of this yere 1612. shal begin the 10 day of
March 18. morn: after 3. of the clocke in the morning, at which time y
Sun is lodged to enter into the first i[n]te[r] of the first equinoctiall signe
called Aries, making then the day and the night of equal length, be-
ginning the true Astronomicall years, vpon which time doth depende
all the principall Judgements Astrologicall, generallie for y whole yere
following.

Having dulee considered the Equinoctiall Theame, and the configu-
rations of the Starres, at the Suns entrance into Aries, we do iudge
that the whele yere following, bat chieflie the Springtime of y yere,
shalbe verie variable and unconstant weather, somewhat inclined to
Stormes and showers, and more could then naturallie it is accustomed to
be, for Saturne Lord of the ascendant, is placed in the second house, and
Mars Lord of the 10 house, is in the first house, and doth governe the
Whole yeres revolution both these doe behould the Moone particulariter,
the Moone is also in coniunction with a fixed Starre of the second mag-
itude, being of the nature of Saturne and Mercurie. All these according
to the

to the observations of the auncient Astronomers, doe threaten great dis-
temperature of the aire, whereby the sturts of the Earth maye be great-
ly hurt and indamaged.

And Alboazon Halie saith, when that Mars in the yearlie revolution
shalbe found in a fird Signe, he doth stirre vp strife and contention be-
twene Princes and their Subjects, without anie great reason or cause,
whiche according to the Theame of this revolution, maye extend it selfe
most vnto the Cleargie, and Ecclesiasticall Persons.

The coniunction of Saturne and Mercurie, vpon the Cuspis of the
second house, sheweth that there will be made manye disceiptful bargains
and contracts, vnder the colour of truth and honestie. Jupiter dispositer
of the same coniunction, and of the second house, is placed in the seuenth
Retrograd, doth partie coniurne the same. I doe not speake of the con-
tousnes and iaggathering of Riches by subtle meanes, which maye be
among Merchants, Scribes, Usurers, and others that are practised
in accounts, but I praye to God to turne those thralled emles to such
good events as maye redound to his glorie, and to the amend of our
lives Amen.

Of the Summer quarter.

Because the Signe ascending in the Equinoctiall Spryng at the Som-
mers entrance into Artes, was a moouable Signe, Ptholomeus hath
commaunded to examine the other cardinall points of Heaven. vidz.
The Sons entrance into Cancer and Libra &c. Wheroppon I haue
found that the Sun shall enter into the first morn of Cancer the 11 daie
of June, 22 min; after 7 a clocke in the morning, making then þ Sum-
mer Solstice, or the longest daie in the yeare, which in the yeare of
Christ his incarnation was at the 24. of June as it doth appeare in þ
third Wallender of this Almanack, which I doe call the true Walender,
but in these our daies it happeneth about the 11. or 12. of June, & con-
tinueth vntill the 12. or 13. of September.

This quarter, concerning the weather is verie like to proue accord-
ing to the nature of the season, vidz. hotte and drye, with seldom fewe
or noe showers, except such as are threatned by the generall significa-
tors of the weather for the whole yeare, wherof we haue spoken be-
fore, in the Spring Equinoctiall, and therefore needeth not haue any
further resitall.

Of Autumne or Harvest.

The Harvest or Autumphall quarter shall begin the 22. day of September at 8. a clock 34. min: after noone, at which time the Sun shall enter into the first min: of the second Equinociall signe called Libra, making then the day and night equall the second time. The weather in this quarter, for the most part shalbee of a reasonable temperature, inclining most to heate and moisture, and it doth continue untill the 12. of December following, and then shall begin the Winter quarter for the Civill yeare of Christ 1613.

Of Phisicall Elections.

The knowledge of Elections of times for the ministracion of medecins is a thing verie necessarie, to all the professors of the art of Medicen, (notwithstanding of them greasse negliged in these our daies) but if they would looke well into the Iatromathematicall discourses of Hermes Trismegistus, or of Gualterus Rufus, or of Claudius Danot, and manie others who haue written of Elections, they shall finde verie excellent obseruations concerning the lyng downe of the sick Person, of the mortall, Judiciall, and chriticall daies, and diverse other thyngs profitable for the health of the partie greeued, comfortable to his friends and allies, and honorabile to the Phisician that ministreth.

For by a due consideracion had of the celestiall bodies, howe they shall be configurated with the Moone from time to time during the sicknes, the Phisician may soz tell the hope of life, the daies of ease, or tormentes, and the time when death is to be feared, if so it shall chaunce.

Nowe let it not seeme dishonorable to anie good Christian that such sortel-
lings may be, for God pouereth out his gifts of knowledge vpon al men
in some measure either more or lesse: to some y giste of healing, to some
the giste of prophesie, to some y giste of interpretation &c. As St. Paul
saith. Therefore I do wish all the practicioners in the Art of Medicen
to obserue the speciall times of elections, according to the opinions of
ancient practitioners, and learned Fathers of the arte, vntill another
doctrine may be found by Arte, and by those whiche are stillfull in the
Arte to ouerthowse these opinions of Elections.

For Hermes Trismegistus hath saide, Multum etiam referet, in qua
hora.

hora primum merbi insultus deprehenditur obseruare, ante tempore
beneficii in ortu sine, aut medium celi, occupent. Plus namque sic con-
sultari, collapſis aliquoſ viſibus, opis ſubminifrabunt, quām prieſtan-
tius poſſet medicus. Scrutare igitur & diem & horam decubitus ex-
acte oportebit, & mundi poſitum examinare. Nichil enim homini ſuper-
uenit, quod ex coeſtu conſenſu & ſympathia non oratur, & originem
ducatur.

Let those which doe meane to hys the rules of Elections, take notice
of these ſew things following.

How the parts of mans boode are governed by the 12.
ſignes of the Zodiac.

Aries.	Head and Face.
Taurus.	Necke, Throte, and Woſte.
Gemini.	E houlders, Armes, and Handoſ.
Cancer.	Wief, Stomacke, Ribbes, Luster, and Aplene.
Leo.	Heart, and Backe.
Virgo.	Womels, Bellie and Midriffe.
Libra.	Haimes, Sauell, Buttocks and Ladder.
Scorpius.	Generatiue Membres, Valentine and Fementum.
Sagittarius.	Thighes, and Hyppeſ.
Capricorne	Knees.
Aquarius.	Shoueres, and Legges.
Pisces.	Feete.

The Ancient Fathers of Physike, ſpeciallie Almanzoar doth com-
maund, not to touch anie of the members with Iron, nor to make a
nic inciſion in them, while the Poone is paſſing through them, ſo, it
hath been ſound by expeſience to prooue verie hurtfull & dangerous.

Doe not let blood when the Poone is in Leo, or in Gemini, or in
aniesigne gouerning the member: where the woſte is to be done, but
it ſhalbe verie profitable to ſpit Dytments, and plasters, frications,
and ſuch other operations as maie be done without ſcarification or in-
juring, notwithstanding that the Poone be there.

A Prognostication.

From the change to the first quarter use extermal applications by bleeding or other tinctions, if the Moone be not there. & from the full to the second quart. From the first quarter to the full Moone, & from the last quarter to the change. Internall emunctations and purgings are to be used, the Moone being in sit places, &c.

There are certaine dates in every year whereth the bodies of men are so strenghtened by the coniunction of the Moone with Jupiter, that whosoever taketh any manner of purging medicine in those daies, the sick person shall profit nothing at all therby, for either the Medicine shall not worke at all, or else so little, that the sick shall not be any whit the better, because that nature in the strength of that coniunction doeth utterly resist the force of the medicinē. Read Pthokome's Centiloquii.

Here followeth yose daies as they are sound aunswerable to this present year 1612.

Januarie	9. 10.	July	6. 19.
Februarie	0. 6.	August	0. 16.
March	11. 12.	Dates	September 0. 12.
Apill	27. 28.		October 0. 10.
May	0. 25.		November 0. 7.
June	21. 22.		December 0. 5.

It is verie dangerous either to purge or let blood in such times of the years as are either extreme hote or extreme colde: nor at any time else without the counsell of a skillfull Physician or an expert Chirurgeon.

Purgations are best taken, when y Moone is in y wateris Triplicitie.

Electionaries Cancer Pisces
with Potions In Scorpius Pisces
Pilles Pilles In Pisces

Letting blood is best, the Moone being well effected in Cancer
Aquarius Pisces

Bathe for healths sake the Moone in Aries, Leo, or Sagittarius, and
cooldunge and beautifie the bodie the Moone in Libra or Pisces.

Elections

Elections for husbandrie.

Seit, Howe, Plant and Graft in fit seasons of the yeare, the Moone being in Taurus, Virgo, or Capricorne, chieflie from the change to the full, and two or three daies after if neede be, &c.

Fell building Timber in the last quarter of the Moone, chieflie when She is in Aquarius, or Pisces.

From the first quarter to the full Moone, croppe Trees and fell wood to burne, that the slacke mire growe the better.

In the moonths of September, October, Novembre, and Februarie, remoue young Trees, the Moone in her last quarter in Taurus or in Capricorne.

Cutt or pryme Wines in Februarie, or March, the Moone increasing in light, being in Taurus, Virgo or Libra.

Selde Cattell in the wane of the Moone, being in Aries, or in Sagittarius, or Capricorne.

Sheare Sheepe from the change to the full.

Poule thy head and shave thy beard, when the Moone is in Libra, Sagittarius, Aquarius, or in Pisces, chieflie from the first quarter to the full Moone.

In regarde of this newe plantation, nowe latelie begun in this Kingdome of Ireland, and for theire sakes which doe daiely repaire hither as strangers to inhabit, I haue heare diligentlie registred all the most principall highwaies throughout all the Prouinces of this lande, with the distances of miles from the Cittie of Dublin to all the chiefeſt Citties and Corporate Townes in each Prouince.

First of the waie from Dublin to Waterford by the Sea side, and from thence to Corcke.

From Dublin to Brey 10. miles, from Brey to Newcastle 8. miles, from Newcastle to Wicklowe 6. miles, from Wicklo: to Artlow 12. miles, from Artlow to Glascarrige 12. miles, from Glascar: to Waterford 12. miles, from Waterford to Rosse 14. miles, from Rosse to Waterford 8. miles, from Waterford to Kilinach-thomas 12 miles, from Kilinach-thomas to Dovngaruan 8. miles, from Dovngaruan to Poghell 10. miles, from Poghell to Cozabbey 10 miles, from Coz-

abbes to Corcke 10. miles, in all 132.

The waie from Dublin to Gowran, & so from thence to all the chiefest
Citties in the Prouince of Mounster.

From Dublin to þ pale 12. miles, from pale to Billcullin 6. miles,
from Billcullin to Castle Dearmot 9. miles, from Castle Dearmot to
Carrelagh 5 miles, from Car: to Laghlin bridge 5. miles, from Lagh-
lin bridge to Gowran 5 miles, in all 42.

The waie from Gowran to Waterford.

From Gowran to Thomastown 5. miles, from Thomastown to Wa-
tersford 15. miles, in all 20.

The waie from Gowran to Yoghall.

FINIS.

The Epilogue or conclusion.

B^roved Readers, Tullie resiting the sentence of Plato, saith, th^t men are not borne for themselves onely, but for their Parents, Friends, and Countrie: my Parents are the Maiestrates of this Kyngome, my friends are the loyall Subiects of the same, and my Countrie is the soyle of Ireland, (not by birth, but by long continuall therin) for whose sakes I haue published this Prognosticall pamphlet, or annuall Kalendar, as a token of my dutie to my parents of my loue to friends, and of my good will to benefit my Countrie. And as I finde this acceptable to those resited, I shalbe incouraged to procede further in some measure yearely to benefite the republike of this Kingdome, with some parte of my laboures: and as concerning my Computation of memorable things, it shalbe enlarged & published by it selfe God, permytting me life. And for the regester of the high-waies and the Faires, whatsoever is wanting in them this yeare, shalbe supplied in other yeares following, in hope that my parents, friends, and Countrie will deale with me as kindele as the shode me willing to discharge my dutie towards them. And thus conclude with prayer, that all things maye be done to the glorie of God, and to the common benefit of this Kingdome: Amen.

FINES.
